

GetThere and SAP

Overview

GetThere® and SAP America, Inc. provide the world's leading integrated travel procurement and expense reporting solution. The companies established a partnership in 2008, coupling *GetThere*'s online booking capabilities with the SAP® Travel Management application to give companies a new dimension of flexibility in business travel: an automated procure-to-pay solution with enhanced spend analytics and reporting.

Both *GetThere* and SAP own reputations for helping corporations reduce costs and recognize more value from their travel budgets. In an economic period where companies are increasingly aware of travel expenditures, *GetThere* and SAP offer proven solutions with an unparalleled service infrastructure in place to serve mid-size and large companies. Together, *GetThere* and SAP bring new levels of efficiency and seamless integration to corporations.

Companies spend millions of dollars on their ERP systems to gain visibility and control over their business. With this partnership, companies can leverage their investment in SAP to maximize the management of travel, their second largest controllable expense.

For SAP customers, the agreement allows them to leverage their SAP investment. The interoperable solution is integrated with the financials, human capital management (HCM), operations, workflow and reporting functions of SAP ERP. *GetThere* customers can reduce indirect costs and improve their efficiency by integrating the expense management and business workflow tools.

How It Works

SAP and *GetThere* have officially raised the bar with the best combination of online booking and expense reporting. Taking into account SAP's certified and supported integration, it's clear a new leader has emerged: *GetThere* and SAP. The solution will utilize SAP's existing Travel Management module by solely replacing the travel booking functionality with the *GetThere* booking tool while keeping many of the other value-added tools like expense reporting and general ledger integration. All trip data from *GetThere* will pre-populate an expense report in SAP Travel Management. Joint customers will have the complete advantage of SAP Travel Management's existing integration with SAP Financials.

Experience Even More from GetThere

The *GetThere* and SAP partnership is just one innovative feature comprising the complete *GetThere* corporate online booking system. A majority of the FORTUNE 200 and the BTN Corporate Travel 100 rely on *GetThere* to streamline processes, improve supplier and contract management, and achieve ongoing and sustainable savings in corporate travel spend.

Contact your *GetThere* representative by calling 1-800-GetThere or visiting www.getthere.com to learn more.
