

Traveller Security And Data Suite

Overview

Much as you'd like, business travellers don't operate within the confines of a bubble. Whether it's a weather event, political situation or labour strike, there are countless scenarios that can affect and potentially disrupt your travellers' plans. The frequency and severity of world events has grown substantially in the past few years, increasing the need for fast and accurate information. You should have the confidence to be able to locate and reach your road warriors 24/7.

Traveller Security and Data Suite allows corporations to quickly locate travellers worldwide and access detailed content, such as travel reservation and personal contact information. The product also provides the ability to query and obtain additional reports for 331 days of pre-trip and three years of historical trip data, including ticketed and un-ticketed data.

How It Works

Upon signing into Traveller Security and Data Suite via a secure web link, the application displays the locations of all current travellers. Users can search further to view expanded results based on date, city and country ranges, and find travellers based on flexible search criteria. Users can also drill down within maps to see travellers by specific locations. You can even access your traveller's itinerary for more detail using an easy link to Sabre® Virtually There®.

Travel Manager Benefits

As a travel manager, you want to provide the services that allow your travellers to be as efficient and productive as possible while on the road. Outside of being easy-to-use and always up-to-date, Traveller Security and Data Suite is a tool you can take advantage of dynamically. Use it to proactively re-accommodate travellers when they'll be impacted and help them do better business. By creating an environment where you can be more cost-efficient, you'll watch your company's results flourish.

Company Benefits

Up-to-date, accurate, actionable and secure – GetThere has taken a comprehensive approach to providing you with traveller data. Traveller Security and Data Suite is also an affordable solution for any size company. Maximise the programme's value by locating travellers in mere seconds and deftly managing them with relevant and timely data. For small and mid-sized corporations, Traveller Security and Data Suite provides traveller risk management features without the cost of having to go through a travel agency.

Traveller Benefits

While you have the peace of mind that you can quickly and easily reach your travellers, they will likewise feel the assurance that someone will contact them if any situation should arise. But it's not only about simple alerts – with the nearly instantaneous information provided by Traveller Security and Data Suite, you can act fast to alter itineraries and re-accommodate travellers. With actionable data, you can be proactive to further ensure safety and drive convenience for your road warriors.

A Superior Business Intelligence Tool

A Web-based application, Traveller Security and Data Suite gathers information from reservations made in Sabre, assuring you that it's up-to-date, accurate and consistently reliable. Historical and pre-trip data is automatically stored for all Sabre reservations, both ticketed and un-ticketed. Air, car, hotel, cruise and rail segments are included. The warehouse stores PNR information within an average of 30 minutes when a reservation is completed. Traveller Security and Data Suite also collects data from reservations made offline, and automatically updates the database for all reservations.

Data Reporting Capabilities

Data reporting is another robust component of Traveller Security and Data Suite. Detailed air, car and hotel data is immediately available for 331 days of pre-trip and three years of post-trip data for reservations made through Sabre. Approved users can query this data to identify and manage various operational and business needs, as well as leverage it to negotiate supplier rates, manage travel policy compliance and identify travel trends. In-depth reports include contact information and complete reservation data.

Reports can be used to assess a corporation's top markets, travellers to high risk countries, and more:

Carbon Emissions –

- > Summary of all air segments by date range
- > Detail breakdown of carbon emission impact by origin and destination

Air Market Share Summary –

- > Top four carriers for user-selected origin and destination, segment count and share percent
- > Historical, advance bookings, or a combination of both

Air Market Share Trend –

- > Month-over-month, quarterly and year-over-year trends for a single origin and destination
- > Historical, advance bookings, or a combination of both

Hotel Rate Summary –

- > Average nightly rate, number of days and total spend per city

Powerful Security

Ensuring your employees safety when they travel is highly critical – perhaps one of your most important job functions. The Traveller Security and Data Suite Flight Threshold Report feature alerts users when the total number of employees or executives booked on one flight exceeds corporate policy. And with live email links, you can quickly contact travellers in the case of an emergency.

Experience Even More from GetThere

The Traveller Security and Data Suite is just one innovative product comprising the complete GetThere travel procurement solution. A majority of the world's major players rely on GetThere to streamline processes, improve supplier and contract management, and achieve ongoing and sustainable savings in corporate travel spend.
